

Other Australian methamphetamine-related resources

The following document is one of three companion resources produced by the National Centre for Education and Training on Addiction (NCETA) as part of a project commissioned by the National Centre for Clinical Research on Emerging Drugs (NCCRED) involving an audit of Australian clinical guidelines for methamphetamine use disorder.

The other two resources in this series are:

Australian methamphetamine-related clinical guidelines

International methamphetamine-related resources.

Number	Title	Focus	Description	Link
1.	Allsop, S. (2008). <i>Drug use and mental health: Effective responses to co-occurring drug and mental health problems</i> . (1 st ed). East Hawthorn, Victoria: IP Communications.	AOD and Mental Health Co-Morbidity.	This is a published book with 21 chapters. It has a focus on people who use drugs and have co-occurring mental health problems. Amphetamine type stimulants and schizophrenia are discussed in chapter 21.	Book. No link available

2.	Allsop, S., & Lee, N. (2012). <i>Perspectives on amphetamine type stimulants</i> . East Hawthorn, Victoria: IP communications.
